Understanding Rational Numbers

Rational numbers include any number that can be expressed as a quotient or fraction, where both the numerator and denominator are integers and the denominator is not zero. This set of numbers encompasses integers, fractions, and decimals that terminate or repeat. Mastery of adding and subtracting these numbers requires a clear understanding of their properties and representations.

Definition and Examples

Rational numbers are numbers that can be written in the form p/q , where p and q are integers and $q \neq 0$. Examples include:

- Integers such as 3, -5, and 0
- Fractions like $\frac{1}{2}$, $-\frac{3}{4}$, and $\frac{7}{8}$
- Decimals such as 0.75, -2.5, and 0.333...

Properties Relevant to Addition and Subtraction

Rational numbers follow specific arithmetic properties that influence how addition and subtraction are performed. These include closure under addition and subtraction, commutativity, and associativity. Understanding these properties enables efficient computation and error reduction when solving problems involving rational numbers.

Examples of Worksheet Problems and Answer Keys

Sample problems from adding and subtracting rational numbers worksheets with answers showcase the types of exercises that support learning. These examples illustrate the range of difficulty and formats included to build proficiency.

Sample Problems

1. Add $\frac{3}{4}$ and $-\frac{2}{5}$.
2. Subtract $-\frac{7}{8}$ from $1\frac{1}{2}$.
3. Add -0.6 and 1.25 .
4. Subtract $\frac{5}{6}$ from $-2\frac{1}{3}$.
5. Add $\frac{7}{10}$ and $\frac{3}{5}$.

Answer Key

1. $\frac{3}{4} + (-\frac{2}{5}) = \frac{15}{20} - \frac{8}{20} = \frac{7}{20}$
2. $1\frac{1}{2} - (-\frac{7}{8}) = \frac{3}{2} + \frac{7}{8} = \frac{12}{8} + \frac{7}{8} = \frac{19}{8} = 2\frac{3}{8}$
3. $-0.6 + 1.25 = 0.65$
4. $-2\frac{1}{3} - \frac{5}{6} = -\frac{7}{3} - \frac{5}{6} = -\frac{14}{6} - \frac{5}{6} = -\frac{19}{6} = -3\frac{1}{6}$
5. $\frac{7}{10} + \frac{3}{5} = \frac{7}{10} + \frac{6}{10} = \frac{13}{10} = 1\frac{3}{10}$
