Understanding Adjective Clauses

An adjective clause, also known as a relative clause, is a dependent clause that modifies a noun or pronoun in a sentence. It provides additional information about the noun, often specifying or describing it in more detail. Typically, adjective clauses begin with relative pronouns such as *who*, *whom*, *whose*, *which*, or *that*.

Recognizing adjective clauses is crucial for understanding sentence complexity and improving grammatical accuracy. An adjective clauses worksheet usually begins with defining and identifying these clauses within sentences to build foundational knowledge.

Definition and Function

The primary function of an adjective clause is to modify a noun or pronoun by providing essential or non-essential information. For example, in the sentence "The book that you lent me is fascinating," the clause "that you lent me" modifies the noun "book."

Relative Pronouns and Adverbs

Adjective clauses often start with relative pronouns like *who*, *which*, or *that*, but can also begin with relative adverbs such as *where*, *when*, or *why*. Understanding these introductory words is key to correctly identifying adjective clauses.
